- Even worked on many other projects like LaunchBytes, Mahashriastro.
- Won doodleblue hackathon 2017.

PROJECTS

HAPPYFOX CHAT

Chat is a powerful live chat software that is simple and easy to use. Having been designed and developed for companies that rely on data, its ability to talk seamlessly with other apps. makes it incredibly powerful for customer support.

MAGNUM

It's an ERP for a textile company. It's used for managing the employees and the internal processes of the company. Currently working on this project.

GOGRABER

GoGraber is for people who travel in their car a lot. In this app a user can join a campaign happening in his area and can earn money by the distance travelled along with the advertisement on his car. Worked on the backend as well as admin and advertiser dashboard.

XBEAUTY(MLM)

Xbeauty is multi level marketing app. Worked on both backend as well as front end.

HANDSHAKE

It's like a visiting card app where users can share their info by handshaking in the app. Worked on the backend logics.
